

# CBR Test Components: Filter Screen & CBR Filter Paper

## Filter Screen

A filter screen is a 100 mesh brass screen with a 5-15/16" diameter.

## Filter Paper

Filter paper is coarse grade paper and comes in a pack of 100. The filter paper is used to separate spacer disc and soil in the CBR mold during compaction operation. In addition, the paper is used over the top surface of the soil when the compaction operation is completed.
