

# Compaction Hammers

## 10lb Compaction Hammer

The manual moisture/density compaction hammer features a 10lb weight. The hammer has a drop height of 18" with a 2" face. Releasing built up air pressure the guide sleeve has four vent holes in each end.

## 5.5lb Compaction Hammer

The manual moisture/density compaction hammer features a 5.5lb weight and 12" drop height with a 2" face. Just like the 10lb hammer the 5lb also features four vent holes on the guide sleeve to release built up air.
