

Economy Auger Assembly

Economy augers have a unique hard-faced and cupped blade that is designed for augering shallow holes in fine grained soils. To turn the auger little effort is needed. When in use the auger advances the hole as the blade diameter exceeds the bucket diameter to produce a 3 5/8" diameter hole.

Features:

- Heavy gauge, heat treated carbon steel bucket for long life
- Cupped blades of unique design to facilitate hold advancement
- Carbon steel auger heads, extensions and cross handle are zinc electroplated for rust resistance
- Quick connect pins avoid use of wrenches
- All stainless steel hand auger assemblies are available for environmental sampling
- A special windowed bucket is available for use in stick clay soils

Accessories

- | | |
|---------|--------------------------------------|
| S-11008 | 2.25" Standard Hand Auger Head |
| S-11010 | 3.25" Standard Hand Auger Head |
| S-11012 | 4" Standard Hand Auger Head |
| S-11020 | Auger Cross Handle |
| S-11021 | Auger Cross Handle with Rubber Grips |
| S-11023 | 12" Auger Extension |
| S-11024 | 20" Auger Extension |
| S-11025 | 24" Auger Extension |
| S-11030 | 36" Auger Extension |
| S-11035 | 48" Auger Extension |
| S-11037 | 60" Auger Extension |
| S-11040 | Connector Pin |
| S-11048 | 2.25" Hand Auger Head, Mud |
| S-11050 | 3.25" Auger Head, Mud |
| S-11052 | 4" Hand Auger Head, Mud |
