

# Workhorse Thermometer with Type K Probe

Workhorse Thermometers have an adjustable offset for calibration to a specific temperature or sensor. It features a sharp LCD display with a 0.1° resolution, and is easy to read in many different lighting conditions. A hold key feature captures current readings. The unit has a long battery life, high accuracy and wide temperature range. Supplied with the thermometer is a bench stand that is compatible with all Type K probes.

## Specifications:

- Recessed adjustable offset offers increased accuracy by allowing user to set thermometer to specific temperatures, in-house calibrations, or a particular sensor
- HOLD function freezes display for easy recording of current temperature
- Probe Range: -45 – 230°C
- Probe Length: 3.25"
- Cable Length: 30"
- Accepts all Type K probes
- Type K Range: -58 – 2372°F (-50 – 1300°C)
- Type K Resolution: 0.1° between -50 – 200°F, 1° elsewhere
- Accuracy:  $\pm 1^{\circ}\text{C} + 0.75\%$  between 0-500°C;  $\pm 1^{\circ} + 1\%$  between 500-750°C;  $\pm 1^{\circ}\text{C} + 2\%$  between 700-1000°C;  $\pm 3^{\circ}\text{C} + 4\%$  between 1000-1200°C;  $\pm 2^{\circ}\text{C}$  at -20;  $\pm 3^{\circ}\text{C}$  at -40;  $\pm 4^{\circ}\text{C}$  at -50
