

Shelby Tube Permeameter

A Shelby Tube Permeameter is designed for testing permeability of undisturbed soil samples in 3in diameter Shelby tubes up to 6in in length. Constructed of rugged corrosion-resistance, components the device comes with top and bottom plates, valves, two stainless steel screens and three threaded tie rods. Inside the top plate is concave to aid in de-airing. The tie rods extend to permit testing in Shelby tubes with up to 12 inches long under constant or falling head conditions.

Shelby Filter Paper Available:

Part#	Description
HM-4189.20	Filter Paper 2", 50mm
HM-4189.25	Filter Paper 2.42"/2.5"
HM-4189.28	Filter Paper 2.8", 70mm
HM-4189.30	Filter Paper 3", 75mm
HM-4189.40	Filter Paper 4", 100mm
