

# LBR Mold & LBR Spacer Disc

## LBR Mold

The LBR mold is constructed of cold-rolled steel mold. The collar extension and solid base plate both clamp on either end of the cylinder. For an LBR test they require spacer discs that are sold separately.

- Dimensions: 6" ID x 6.1" H with a 2.5" detachable collar
- Volume: 1/13.33 ft<sup>3</sup>

## LBR Spacer Disc

The LBR Spacer Disc is designed to be used as a false bottom in a soil mold during the compaction process. The disc is steel plated rust-resistant and is 1.416" H x 5-5/16" Dia.
